DETAILED ACTION

1. Claims 1-70 are pending in the application and are currently under prosecution.

Please Note: In an effort to enhance communication with our customers and reduce processing time, Group 1640 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

Elections/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I. Claims 1-47 and 63-68, drawn to a method for determining the effect of an agent on cell proliferation, a method for determining cell proliferation of a cell, and a method of screening mammalian cells, classified in class 435, subclass 8.

Group II. Claim 48-55, 69, and 70, drawn to a vector, a host cell, and a kit, classified in class 435, subclass 320.1, class 435, subclass 325, and class 435, subclass 810, respectively.

Group III. Claim 56-62, drawn to a method of diagnosis, classified in class 424, subclass 9.2.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and III are disclosed as materially different methods that differ at least in objectives, method steps, reagents and/or doses and/or schedules used, response variables, assays for end products and/or results, and criteria for success and therefore, the claimed methods are distinct.

The inventions of Groups II and I/III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (i) the process for using the product as claimed can be practiced with another materially different product or (ii) the product as claimed can be used in a materially different process of using that product [see *MPEP* § 806.05(h)]. In the instant case the product as claimed can be used in a materially different process of using that product, such as a method of determining the effect of an agent on transcription in a cell.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and/or recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Lisa Haile, Ph.D. on January 8, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen L. Rawlings, Ph.D. whose telephone number is (703) 305-3008. The examiner can normally be reached on Monday-Thursday, alternate Fridays, 8:00AM-5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony C. Caputa, Ph.D. can be reached on (703) 308-3995. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4242 for regular communications and (703) 308-4242 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
